THIS PROJECT HAS RECEIVED FUNDING FROM THE EUROPEAN UNION'S HORIZON 2020 RESEARCH AND INNOVATION PROGRAMME UNDER THE MARIE SKŁODOWSKA-CURIE GRANT AGREEMENT NO 101007579

SciCoMove focuses on "provincial" and "peripheral" museums and collections, in particular those resulting from three crucial fields in the nineteenth-century natural sciences: paleontology, anthropology, and botany and the related "applied sciences", such as horticulture, commercial geography, pharmacy, and pest control.

In recent years, natural history museums have been studied as stimulators but also as results of economic activities in local, provincial and imperial contexts. Conversely, pharmacy, horticulture, commerce and industry generated their own collections either as an advertising device or in relation to knowledge and economic innovation. Models of fruits were produced as part of the forgotten discipline of pomology; botanical, zoological and mineralogical collections were part of the teaching and practice of pharmacy, ethnographic artefacts were displayed in relation to commercial geography. Today these collections are dispersed or fragmented according to contemporary disciplines. Their origins, past uses and former connections are forgotten.

The SciCoMove workshop #5 in Angers October 6th 2023 focuses on these topics: our goal is to reestablish lost connections thanks to archival and documentary research.

9.30 AM - Welcome (coffee)

- **10. 00 AM - Introduction : *Scientific collections in the context of application***

Cristiana Oghină-Pavie, Université d'Angers TEMOS UMR CNRS 9016

- **10.30 - *The Spanish Pomona Project: experimental horticulture in 19th-Century Barcelona***

José Pardo Tomás, IMF - Consejo Superior de Investigaciones Cientificas Barcelona

- **11.15 - *Seeds in collection: conservation of living organisms and basis of work for Seed Testing Stations (1869-1939)***

Anais Got, Université d'Angers, TEMOS UMR CNRS 9016

12-1.30 PM - Lunch

- **1.30 PM - *Cesare Lombroso's collection and the applications of psychiatry and criminal anthropology***

Silvano Montaldo - Università degli Studi di Torino

- **2.00 *Grasses and livestock in Rio de la Plata***

Susana Garcia CONICET - Museo de La Plata

- **2.45 *Weaving nets: fisheries and natural history from Barcelona in Enlightened France***

Aina Trias Verbeeck - Agencia Estatal Consejo Superior de Investigaciones Cientificas

15h30 - 15h45 Break

- **3.45 *Forever young. Roses collections in genetic research***

Agnès Grapin, Jérémy Clotault, Alix Pernet, Valery Malécot, Fabrice Foucher, Vanessa Soufflet)(IRHS Université d'Angers, Institut Agro, INRAE

- **4.30 *General discussion and concluding remarks*** by Nathalie Richard- Le Mans Université, TEMOS UMR CNRS 9016, Irina Podgorny - CONICET Museo de La Plata

6.00 PM End of the Workshop

- Université d'Angers - Maison de la recherche Germaine Tillion 5bis Bd. Lavoisier Angers
